SUMMARY

AI & Automation Engineer with expertise in building AI agents, workflow automation, and LLM-driven solutions using n8n, Supabase, AntiGravity, CursorAI, Python, and modern AI frameworks. Experienced in OCR automation, real-time pipelines, and full-stack development. Passionate about creating scalable systems that reduce manual work and improve business efficiency.

EDUCATION

University of South Florida

Aug 2023 - May 2025

Master of, Computer Science

• GPA: 3.66/4

Aditya Engineering College

Jun 2017 - Jul 2021

Bachelor of, Computer Science and Technology

• GPA: 3.54/4

WORK EXPERIENCE

NeuralSeek

Oct 2025 – Dec 2025

AI Agents Developer Intern

Miami, FL

- Developed no-code, agentic AI solutions leveraging LLMs, RAG, and CAG with prompt engineering techniques.
- Built no-code AI agents using LLMs, RAG, and CAG to automate enterprise workflows.
- Applied AI safeguards, human-in-the-loop review, and data security constraints.
- Contributed to scaling multi-agent architectures for high-performance environments.
- Used AntiGravity and Cursor AI to accelerate prototyping and improve workflow reliability.
- Delivered a capstone demo showcasing a full agentic AI system.

BlackSeed Labs LLC – Faces2Hire Project

Aug 2025 – Oct 2025

AI Intern - Full Stack Development On-Site

Hudson, FL

- Integrated backend services and REST APIs using Node.js and Express for real-time AI workflows.
- Implemented Supabase with PostgreSQL for backend data storage, authentication, and secure queries.
- Streamlined Git workflows with structured branching & PR cycles, reducing integration conflicts by 40%.
- Resolved 15+ navigation/state management issues, reducing user-reported errors by 25%.
- Collaborated in Agile sprints using Cursor AI and AntiGravity to accelerate development.

Lillup Company

Jan 2025 - Aug 2025

AI Tools [STT & TTS] Intern

Remote location

- Conducted in-depth research and evaluation of multiple GitHub repos for speech-to-text and TTS solutions, analyzing limitations and determining the best-fit technologies for embedded deployment.
- Researched and evaluated STT/TTS GitHub projects for embedded deployment.
- Developed optimized Whisper AI / Sherpa-ONNX pipelines, improving latency & accuracy.
- Integrated WaveNet / Coqui TTS for natural speech synthesis across devices.
- Applied quantization and hardware acceleration for low-latency production usage.
- Documented technical reports and ensured data quality through systematic evaluation..

TATA CONSULTANCY AND SERVICES

Aug 2021 - Feb 2023

SUPPORT ANALYST

Hyderabad, India

- Supported Automation Anywhere (v11) RPA bots in production—debugging, enhancements, and issue resolution.
- Managed JIRA tickets and coordinated with business, QA, and dev teams for approvals and deployment.
- Analyzed FDD/TDD documentation for compliance and potential automation failures.
- Executed dry runs and monitored bot performance, resolving issues proactively.
- Diagnosed Linux/Unix system issues, resolving bottlenecks and improving system stability.
- Documented incident workflows and reduced resolution time through process optimizations.
- Implemented backup and recovery strategies to maintain business continuity.

INTERNSHIP - DATA SCIENCE

Predicting Survival of People in the Titanic Ship

Jun 2020 - Aug 2020

Internshala

Delhi India

- Built a Random Forest model to predict Titanic passenger survival using demographic and travel features.
- Performed feature engineering, preprocessing, and model tuning.
- Evaluated performance using accuracy, precision, recall, F1-score, and confusion matrices.

Projects

AI & AUTOMATION PROJECTS (n8n + Google Sheets + LLMs) - https://github.com/AnilSami/AI_Agents

- **Sales Query Agent (n8n + Telegram + Sheets)**
 - Built a natural-language sales assistant that retrieves sales data between any two dates.
 - Used AI agent to parse date ranges, Sheets API to fetch rows, and calculator node to aggregate totals.
 - Sends formatted sales summaries back to the user through Telegram.
- **Invoice Processing Agent (Document → JSON → Sheets)**
 - Automated invoice extraction using OCR + AI model for structured parsing.
 - Supports PDF and image inputs via Telegram or Google Drive.
 - Extracted data is validated, transformed into JSON, and appended to Google Sheets.
- **Daily Sales Summary Agent (n8n + Email)**
 - Scheduled automation running daily at 6 PM to compute total orders and revenue.
 - Filters today's sales, calculates totals, and emails the summary to the owner.
 - Sends a warning email if no sales are recorded for the day.

Academic Project - Bachelor's Degree - https://github.com/AnilSami/Lip_Reading

- Built a CNN model to recognize words from lip movements for patients with speech impairments.
- Processed video frames using OpenCV for lip segmentation.
- Led project design, model development, tuning, and documentation.
- Contributed to the optimization and fine-tuning of the deep learning model for accurate lip movement recognition.

SKILLS

- **Programming & Scripting:** C, C++, Python, JavaScript, HTML, CSS, SQL, Bash.
- **AI/ML & Data Science:** TensorFlow, PyTorch, OpenCV, Scikit-learn, Whisper AI, Sherpa-ONNX, WaveNet, CNN/RNN, RAG, AI Agents, Prompt Engineering.
- **Web & App Development:** React.js, TypeScript, Node.js, Express.js, Flask, REST APIs.
- **Databases & Cloud:** Supabase, PostgreSQL, Google Cloud, Azure AI.
- **Automation Tools:** n8n, AntiGravity, Cursor AI, Automation Anywhere (v11), NeuralSeek Platform.
- **Tools & Platforms:** Git, GitHub, Docker, DBeaver, JIRA, Agile/Scrum, SAP.
- **Operating Systems & Protocols:** Windows, Unix/Linux, TCP/IP
- **Soft Skills:** Debugging, Incident Management, Data Collection, User Account Management, Documentation, Cross-team Collaboration, English Proficiency

CERTIFICATIONS

- **Python Beginner to Advanced:** GeekForGeeks(Problem Solving, Object Oriented Programming, Basics of Data Structures)
- **Microsoft Azure AI Essentials:** Microsoft (Cloud AI, Machine Learning)
- **Python (Basic):** HackerRank (Programming Fundamentals, Problem Solving)
- **Problem Solving (Basic):** HackerRank (Algorithmic Thinking, Logic Building)
- **Data Science for Engineers:** NPTEL (Data Analysis, Statistical Methods)
- **Python for Data Science:** NPTEL (Data Wrangling, Visualization)
- **Machine Learning:** Coursera (Supervised & Unsupervised Models)
- **Crash Course on Python:** Coursera (Scripting, Automation)
- **Bits and Bytes of Networking:** Google/Coursera (Network Fundamentals, Internet Protocols)
- **Automation Anywhere A2019 (Advanced):** RPA, Workflow Automation
